AMIKOM Yogyakarta

B.Sc. Computer Science
2020–2022

Universitas Sebelas Maret

Vocational HS Informatics
2016–2019

CERTIFICATIONS

- Membuat Aplikasi Web dengan React – Dicoding
- Belajar Dasar AI – Dicoding

LANGUAGES

Indonesia — Native

English — Passive

PROFESSIONAL PROFILE

Experienced Web Developer with **6+ years** in PHP, **Laravel**, and **CodeIgniter**. Proficient in building enterprise monolithic systems and REST API backends following **Controller–Service–Repository** pattern and Clean Code. Contributed across healthcare, finance, government, and education. Currently expanding frontend expertise with **React.js**.

WORK EXPERIENCE

Middle Programmer

Jan 2022 – Present

PT Alfahuma Rekayasa Teknologi

- Developed a corporate LMS for internal employee training programs.
- Built a Warehouse Management System for inventory and logistics control.
- Contributed to Digital Corsec BRI, e-form system, and Functional Position app (KEMENTAN).
- Applied Controller–Service–Repository pattern across all Laravel projects.

Stack: PHP, Laravel, CodeIgniter, MySQL, PostgreSQL

Programmer

Jan 2020 – Apr 2022

PT Medika Digital Nusantara

- Developed Hospital Information System (SIMRS): patient registration, pharmacy, billing.
- Worked with a proprietary custom PHP framework alongside Laravel.
- Collaborated cross-functionally for seamless module integration.

Stack: PHP (Custom Framework), Laravel, MySQL

Programmer

Aug 2019 – Dec 2019

Phicos Group

- Developed LPPKS digital information kiosk for an educational institution.
- Contributed to web projects for government ministries and public education bodies.

Stack: PHP, CodeIgniter

ARCHITECTURE APPROACH

- **Controller** — Lean HTTP request & response handler only.
- **Service** — Manages all business logic and data transformation.
- **Repository** — Abstracts database queries via Eloquent/Query Builder.
- Supports both **monolithic** (Laravel + Blade) and **REST API** backends.
